

SHYAM MAHATO

SENIOR SOFTWARE DEVELOPER | FULL-STACK DEVELOPER | TECHNICAL LEAD

Panchkula, Haryana, India | +91 84270 45734 | er.shyam413@gmail.com

|

PROFESSIONAL SUMMARY

Senior Software Developer and Full-Stack Developer with **5+ years of professional software development experience**, specializing in React, Next.js, TypeScript, JavaScript, production portals, dashboards, booking platforms, CMS products, workforce systems and business applications. Experienced in taking products from requirements and UI architecture through API integration, database-backed workflows, performance/SEO optimization, deployment and production support. Through Dynoserve, I also coordinate multidisciplinary delivery across frontend, backend, mobile, UI/UX, QA and deployment.

Strong fit for freelance and Upwork engagements requiring a senior technical point of contact who can understand business requirements, recommend an implementation approach, coordinate specialists when needed, and remain accountable for delivery.

CORE TECHNICAL EXPERTISE

Frontend	React.js, Next.js, TypeScript, JavaScript ES6+, Vite, Redux, HTML5, CSS3, Responsive UI
Backend	Node.js, Express.js, REST APIs, Prisma ORM, API integrations
Database	PostgreSQL, Supabase, MongoDB, relational data modeling
Architecture	SSR/SSG, Microfrontends, Module Federation, RBAC, route guarding, component-driven architecture
Mobile	React Native, Flutter, Android/iOS delivery through multidisciplinary team
Integrations	Razorpay, Google Ad Manager, live maps/tracking, third-party APIs
DevOps	Git, GitHub Actions, CI/CD, Linux CLI, Webpack, npm
Performance & SEO	Core Web Vitals, Lighthouse, semantic HTML, structured metadata, lazy loading, image optimization, Search Console
Product Systems	SaaS, CRM/ERP-style systems, booking, e-commerce, admin panels, dashboards, automation

PROFESSIONAL EXPERIENCE

Altruist Technologies Pvt. Ltd. — Software Engineer / Senior Software Engineering Responsibilities | Aug 2021 – Present

- Built and maintained high-traffic media products including News18 Group, CNBC TV18 and Storyboard18 using React, Next.js and modern frontend architecture.
- Improved Storyboard18 organic search impressions from ~100K to ~180K and News18 Group impressions from ~2M to ~4M through SSR, semantic HTML and structured metadata.
- Reduced Storyboard18 page load time from ~10 seconds to ~3 seconds through SSR/SSG, lazy loading and image optimization.
- Delivered real-time election dashboards, scalable state management and monetization integrations.
- Built enterprise portals for logistics, telecom operations and workforce management with dashboards, role-based access, maps, tracking and business workflows.
- Developed full-stack platforms using Next.js, Node.js, PostgreSQL, Prisma and Supabase, including authentication, booking workflows, business logic and Razorpay payment integration.
- Built internal workforce management software used by 500+ employees with multi-level RBAC, task assignment and progress tracking.
- Used GitHub Actions/CI-CD and production engineering practices for reliable delivery.

SELECTED PROJECTS & PORTFOLIO

News18 / CNBC TV18 / Storyboard18	High-traffic media platforms with SSR/SSG, SEO, performance optimization, live election dashboards, monetization integrations and scalable architecture.
JanakpurZone / Tridev Gurukul	News and publishing platform with public site and admin CMS using Next.js, Prisma and Supabase; editorial workflows and SEO-focused architecture.
Tawseel Logistics — UAE	Enterprise fleet portal covering vehicle/rider management, live GPS tracking, invoicing, expenses, analytics and role-based access.
Bharat Caravans	Full-stack travel booking platform using Next.js with 12+ user-facing pages, optimized performance, booking flow and a separate admin panel using independently deployable microfrontends.
ExploreSathi	Full-stack travel/trip-planning platform using Next.js, Node.js, PostgreSQL, Prisma and Supabase with authentication, trip planning, booking workflows and Razorpay payments.
JobTracking Portal	Workforce management platform used by 500+ employees with multi-level RBAC, task assignment, progress tracking, dashboards and CI.

Secova / Secova Health	US health-tech public sites plus benefits administration portal; responsive frontend, portal/admin experiences and production web delivery.
Glow Networks / TRACE	US telecom company website plus operational TRACE portal for resource tracking, allocation, cost and efficiency workflows.
Beta Labs Telecom	Website and operations portal for network-tower survey workflows across US, UK and Sweden.
Teligent Telecom	Public telecom/network engineering website for an international technology and infrastructure business.
CMO Axis / Altruist World / The Altruist India / The Altruist Hotels	Production corporate, hospitality and group websites covering business presentation, services, booking and information workflows.
Dynoserve	Independent technology services company website representing web, mobile, backend, AI and multidisciplinary software delivery capabilities.

SENIOR SOFTWARE DEVELOPER / TECHNICAL LEAD CAPABILITIES

- Translate business requirements into technical solutions, development plans and delivery milestones.
- Design frontend architecture for complex portals, dashboards, CMS platforms and business applications.
- Take ownership of full-stack product workflows when frontend, API, database and integration work is required.
- Coordinate backend, mobile, UI/UX, QA and deployment specialists through Dynoserve when broader delivery is needed.
- Work directly with clients on requirements, technical discussions, estimation and project communication.
- Select practical technology stacks based on product scope, scalability, timeline and maintainability.
- Review technical approaches and coordinate delivery across multiple specialists.

FREELANCE / UPWORK POSITIONING

I work as a Senior Software Developer and Technical Lead for freelance engagements. I can personally handle senior frontend/full-stack engineering responsibilities and coordinate a multidisciplinary Dynoserve team when a project requires additional backend, mobile, UI/UX, QA, DevOps or AI expertise.

SERVICES I CAN PROVIDE

- Full-Stack Web Application Development
- React / Next.js / TypeScript Development
- Node.js / REST API / PostgreSQL Development
- Admin Panels, Dashboards & RBAC Systems
- SaaS, CRM, ERP & Enterprise Portals
- Booking, Marketplace & E-commerce Platforms
- School ERP & Business Management Systems
- AI Integrations & Business Automation
- React Native / Flutter Mobile Applications
- Performance Optimization & Technical SEO
- Third-Party API, Maps & Payment Integrations
- End-to-End Product Development & Technical Leadership

BUSINESS DOMAINS

Media & publishing • Travel & tourism • Logistics & fleet management • Telecom • Health-tech • Workforce management • Education / school ERP • E-commerce • SaaS • Business automation • Corporate websites • Internal enterprise applications

KEY DELIVERY STRENGTHS

Production-grade responsive interfaces • Complex dashboards and data visualization • RBAC • Booking and payment workflows • CMS/admin systems • Live maps and tracking • SEO and Core Web Vitals • API integrations • Microfrontend administration • CI/CD • Client communication • Technical ownership

DYNOSERVE DELIVERY CAPABILITY

Through Dynoserve, I can coordinate a dedicated multidisciplinary team covering frontend, backend, mobile, UI/UX, QA, DevOps and AI. This supports engagements ranging from a single web application or admin dashboard to complete multi-platform products.

EDUCATION

M.Tech, Computer Science & Engineering — Swami Vivekanand Institute of Engineering & Technology, Punjab | 2025 | CGPA 8.63/10

B.Tech, Computer Science Engineering — Swami Vivekanand Institute of Engineering & Technology, Punjab | 2018–2022 | CGPA 8.63/10

Higher Secondary (10+2) — Bridgewater International College, Kathmandu, Nepal | 2017

SELECTED PRODUCTION METRICS

4M+ monthly search impressions on News18-related work • **~80%** organic growth for Storyboard18 • **10s** → **~3s** Storyboard18 page-load improvement • **500+** employees supported by JobTracking • **12+** user-facing pages in Bharat Caravans

PROFILE INTEGRITY NOTE

This resume separates direct production experience from broader Dynoserve team capability. Java/Spring Boot and applied AI should be presented as team capabilities or developing skills unless a specific production project can substantiate direct personal experience.
